

Edenfield C E Primary School

Medium Term Plan - Sequence and Progression

Subject: Computing

Unit: Year 5 – Digital Content

Key Vocabulary

- Composition
- Content
- Purpose
- Publish
- Audience
- Convert
- Podcasting
- Collaborating
- Editing

Lesson Sequence

- | |
|---|
| 1. LO: Investigate different services that produce digital content |
| 2. LO: Use a range of devices to create digital content |
| 3. LO: Use digital devices to create sounds |
| 4. LO: To select the most appropriate tool |
| 5. LO: To upload and download projects using different file types |
| 6. LO: Discuss when it is appropriate to create and use digital content |
| 7. |
| 8. |
| 9. |

Skills

- Select, use and combine internet services to create digital 'content' (including programs and systems).
- Demonstrate awareness of intended audience in work.
- Independently select the most appropriate ICT tools for intended purpose and audience.
- Routinely evaluate and improve work as part of the design process.
- Use a range of digital devices to produce digital 'content'.
- Create their own sounds and compositions to add to presentations, animations and films.
- Use ICT to produce music or sound effects for a specific purpose, considering the impact on the audience, e.g. length, style, genre.

By the end of the unit pupil will know:

- Understand the importance of content and editing to produce digital content for specific audiences.
- Understand that many different devices can be used in isolation and sometimes together to produce digital 'content'.
- Understand that you can convert between different formats of files.
